## HOW IT WORKS

### THE ECS ENDOCANNABINOID SYSTEM

The Endocannabinoid System, or ECS for short, is a biological system composed of endocannabinoids, which are neurotransmitters that bind to cannabinoid receptors. These go all throughout your body and nervous system, including the brain. The ECS is involved in properly regulating physiological and cognitive processes including fertility, metabolism, pregnancy, appetite, pain-sensation, mood, sleep, and memory. The first way your body's ECS is engaged is by receiving endocannabinoids in breast milk as a baby! We are meant to have these!

## HOW IT WORKS

**Relax Blend or Energy Blend + CBD!**

Full spectrum hemp extract is not water soluble, so we created this CBD isolate product for those who prefer a drink over a tincture, vape additive, or capsule.

**WATER SOLUBLE**  
for those who prefer drinks  
over other methods of use.

## HOW TO USE

APPLY GENEROUSLY TO AFFECTED AREA. REPEAT AS NEEDED.

**AIRLESS  
PUMP BOTTLE**

**ZERO  
WASTE**

The airless bottle has no dip tube but rather a diaphragm that rises to evacuate the product. When user depresses the pump, it creates a vacuum effect, drawing the product upwards.
